

## Speaker Bios – ECN Panel January 15, 2019

### **Elizabeth Boudreau**

Executive Advisor, Professional Services  
Amazon Web Services

Elizabeth Boudreau is an Executive Advisor at Amazon Web Services (AWS) with over a decade of Healthcare IT experience. She works with customer executive teams globally to understand their mission and business drivers in order to assist them in developing appropriate strategies for sustainable cloud adoption. In this role, she enables business with IT, builds center of excellences, training opportunities, culture changes, and organizational change management.

Prior to AWS, she was the Senior Director of IT and HIPAA Privacy and Security Officer at Claritas Genomics leading all of the IT activities for informatics, bioinformatics and laboratory. At Boston Children's Hospital (BCH), she coordinated the requirements and implementation of a clinical bioinformatics pipeline for the future of genetics research and clinical application. Earlier at BCH, Elizabeth directed a team of software developers responsible for the innovative creation of internal custom clinical software and mobile solutions. Elizabeth brings a clinical mindset to the adoption of technology and addressing healthcare challenges. In balance to a Masters in Health Informatics from Northeastern University, Elizabeth has a Bachelor's of Arts in Art History and Architectural Restoration from Boston University.

### **Naomi Lenane**

Vice President & Chief Information Officer  
Dana-Farber Cancer Institute

Naomi Lenane was appointed Chief Information Officer and Vice President of Information Services in June 2017. She is responsible for all software and infrastructure supporting the Dana-Farber Cancer Institute clinical and business operations, including care delivery, business & administrative functions and human capital.

Prior to her role as CIO, she held multiple roles at Dana-Farber, including the IS leader for the Epic Health Record implementation. Naomi received her undergraduate degree from Randolph College (formerly Randolph-Macon Woman's College). She is an active member of HIMSS, CHIME and SIM with a focus on women in technology.

## **Cara Babachicos, MHA, FCHIME, CHCIO**

Senior Vice President & Chief Information Officer  
South Shore Health System

Cara Babachicos earned her Bachelor of Science degree from Boston College in the School of Management and her Master of Science Degree in Health Care Administration from the University of New Hampshire.

Cara has twenty-five years experience working in healthcare information systems with a career that spans across acute care, non-acute, for profit-vendors and consulting. She is passionate about systems and processes that help to support the patient across the healthcare continuum and in the home as we age.

Cara is currently Senior Vice President/Chief Information Officer at South Shore Health system a regional community health system in the Boston area. In her role she is responsible for IT and Innovation. Prior to South Shore, Cara was the CIO over Community Hospitals and Post Acute sites at Partners Healthcare.

Cara is an active member of the CIO community and is also on the faculty of CHIME where she teaches in the CIO Boot Camp. In the past Cara taught at Northeastern University in the masters program for Healthcare Informatics and has created their first online program focusing on Patient Informatics and the Patient Experience.

In her spare time Cara and her yellow Lab are a Pet Therapy team that go to hospitals, hospices and colleges to help patients and college students cope with stressful times.
